**PROJECT TITLE**

# **Employee Performance Analysis using Excel**

# AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Our Solution and Proposition
5. Dataset Description
6. Modelling Approach
7. Results and Discussion
8. Conclusion

# PROBLEM STATEMENT

A large dataset of employee information in Excel, including personal details, job roles, performance metrics, and attendance records. Despite having this data, we face challenges in efficiently analyzing and leveraging this information for decision-making.

# PROJECT OVERVIEW

It is a summary of employee dataset analysis the employees salary package defined with basic pay with allowance and deductions usually monthly pay for current working employees based on their designation. performance analysis in order to check the trends and different categories like high medium low performance level of the employees

# Dataset Description

Employee dataset – salaypackage

Employee ID - ASUM123 TO ASUM 948.

Name – Text

Performance Level – Very High , High , Medium , Low

Gender – Male , Female

# MODELLING

DATA COLLECTION :

1). Name	2).
Employee UID	3).
Desination	4). Basic
pay	
5). allowance	
6). deductions	
7). Net salary	

PERFORMANCE LEVEL:

1). Very high	2).
High	3).
Medium	4).
Low	

# RESULTS

# conclusion

In summary, a comprehensive conclusion for a data analysis in a research study involves a strategic synthesis of key finding of the salary package of an each employee specifically and their implications, contribution to the organisation as a brief .
